Sporobolus, Prairie Dropseed	Native	small clump	Warm	Dry		✕	

Forms: Clump - Forms a single clump that thickens with time.
 Small clump - Small clump that stays small over time.
 Upright clump - Taller than wide clump that thickens with time.
 Runners - Spread by rhizomes or stolons, sod forming and spreading.

Season: Cool season grasses - Starts growing early in spring and performs better when temperatures are cool and has sufficient water during warm season.
 Warm season grasses- slow to start growing, especially in our climate, and perform better during drought. Cut plants back to 4-6" in the spring.

Heights: (In flower) S=Short (<12") M=Medium (12-24") T=Tall (>24")

Plant size, description and color can be found in the Grassl Section of our catalog.
